QR Codes

A QR code is a type of barcode that can store a lot of information. The "QR" stands for "Quick Response." You can often see QR codes in advertisements, on product packaging, and even in museums. They are very popular because they are easy to use and can store more information than a regular barcode.

To use a QR code, you need a smartphone with a camera and a QR code reader app. When you (1)_____ the camera at the QR code, the app will scan it. Then, it will (2)_____ you to the information stored in the code. This could be a website, a video, or even a contact number.

QR codes are very (3)_____ in many industries. For example, restaurants often use QR codes to share their menus with customers. This way, customers can view the menu on their phones (4)_____ touching a physical menu. QR codes are also used for (5)_____ payments. Instead of paying in cash or by credit card, you can scan a QR code to make a payment directly from your phone.

One of the biggest (6)_____ of QR codes is that they can hold a lot of information in a small space. However, QR codes are not without their problems. First of all, they require a smartphone and a QR code reader app, which not everyone has. Another problem is that some QR codes can lead to (7)_____ websites, which can be dangerous.
